

Tylö Expression Combi

reddot design award

A new expression in saunas

The design and inherent qualities of Tylö's Expression sauna heater have set a new benchmark in the industry. Its design has won much acclaim and has received the international Red Dot Design Award. However, it is not just the outside of this product that attracts attention.

In addition to its innovative design, Expression Combi has the same quality standards as Tylö's other sauna heaters; twin side chambers that spread hot air more evenly, a holder for fragrant essences and double outer mantles. This heater comes with the new, sleek h-control panel, which has touch control for your convenience. Mount the control panel on a wall inside or outside your sauna room.

The heater stands on the floor with robust legs with automatic water supply. You can choose to manually drain the tank. Whatever your choice, you can enjoy an award-winning sauna heater that is both a treat for your body and your eyes.
